

Lecture 5: Sustainable Systems as if People Mattered

February 24, 2011

A PACIFIC INSTITUTE FOR CLIMATE SOLUTIONS, SFU AND UBC PUBLIC LECTURE SERIES

Sustainable Systems as if People Mattered

Changing behaviour—especially the ways we use energy and water—is an essential part of any climate solution. Yet, our urban systems often preclude people from understanding and controlling them to improve efficiency. Dr. Stephen Sheppard, Dr. Lyn Bartram and Dr. Woodbury come together to present two multi-university research projects—the *Greenest City Conversations Project* and *Human-Centred Systems for Sustainable Living*. These projects explore the interaction of technology and people, at both individual household and community scales, in making better decisions on energy and resource use.

Register online at www.picspubliclecture5.eventbrite.com. Free registration for this event is encouraged, but not required.

- **Date:** Thursday, February 24, 2011, 7pm – 9pm
- **Location:** RM 420, SFU Wosk Centre for Dialogue, Vancouver
- **Live Web Stream:** www.pics.uvic.ca/events.php

Dr. Sheppard is a Professor in the Faculty of Forestry and Landscape Architecture, UBC, and Director for the Collaborative for Advanced Landscape Planning at UBC.

Dr. Bartram is an assistant professor in the School of Interactive Art and Technology at SFU, where she is a cofounder and Director of the Humans, Visualization & Interfaces Lab.

Dr. Woodbury is a Professor in the School of Interactive Arts and Technology at SFU, and Director, Art and Design Practice of the Games, Animation and New Media Network in Canada.
